Outline the following details in your proposal taking a number of pages as your team sees fit. **But before filling the pages, going through the Instruction Manual Document is highly advised.**

1. The problem that is being addressed and why it is important?

*Briefly explain the problem that you are addressing, and it should be related to the **Health Care Sector**. If you want to have a clear idea, please go through the Section 7 in the Instruction Manual Document.*

Include statistics and other related facts to confirm that the respective problem is worth investigating.

2. The process of information collection about the problem.

State how you got to know about the problem, surveys you did or done by others, how you gather data and the resource persons you reached. Add the references where you find the details via the internet.

3. A brief description of the solution

Overview, method, functional diagrams, required resources should be included under this section. Note that this section covers the majority marks of your proposal. Briefly describe the overview of your solution, methodology and the required resources that you need to build the solution. Use functional diagrams and charts to show the product architecture and others. Mention the novelty and the uniqueness of your solution.

Brief description about the market analysis and the competitors out there. If there are no competitors, explain why?

4. Impact of the solution on the healthcare sector.

Describe how sustainable your product is, how it addresses the problem that you are trying to solve and how will the customers get benefits through your product?
